Mesh Infill Panels for Handrails & Balustrades

Lockinex®

great service, great quality

INTRODUCTION

Lockinex manufacture mesh infill panels to specific sizes to fit into either a new installation or an existing balustrade/Guardrail.

Angled, Corner and flat panels are all available to order.

APPLICATION

Many guardrail installations will require the additional protection afforded by the installation of mesh infill panels.

Preventing the passage of young children, animals and indeed in some cases moving debris, mesh panels are a most economical and practical solution.

DESIGN

Designs can vary from application to application. Mesh panels can be deliberately used to control debris in waterways, landfill and amenity sites.

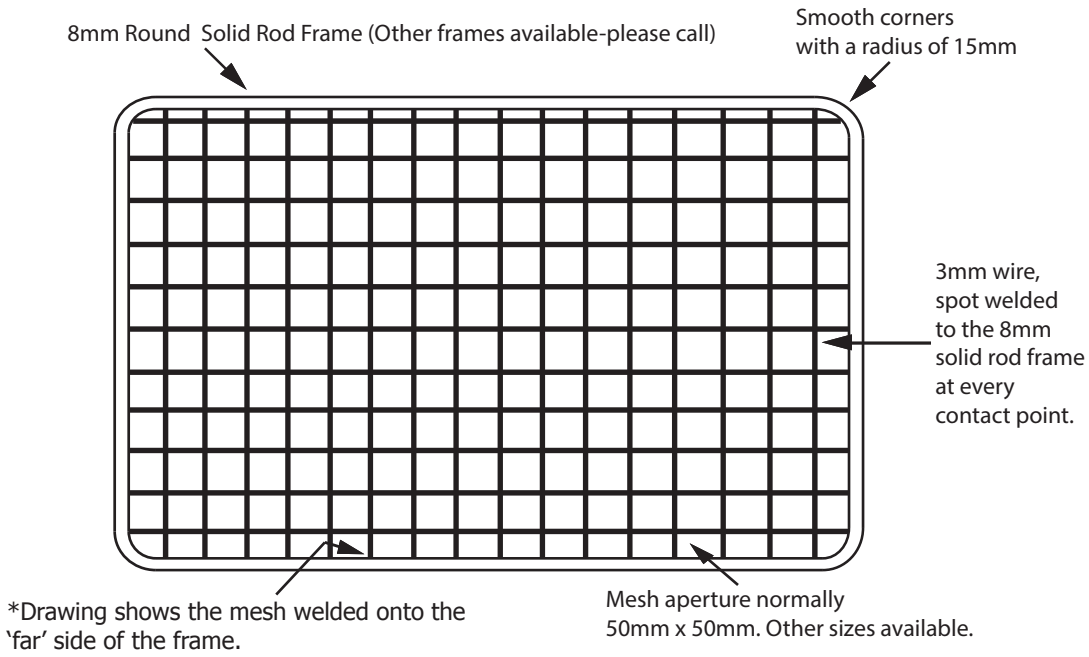
The size of the aperture/opening in the mesh is the most important dimension.
50mm square is the most common in guardrail applications as they meet the design criteria for loadings to the relevant British Standards & Euro Norms.

COMPOSITION, MANUFACTURE

The most common mesh panels have an aperture (the hole in the square mesh) of 50mm.
They are generally of a mild steel material, with a rod stiffening frame & galvanised after manufacture. Many other sizes of mesh, frame designs and material types are available - Please call to discuss.

MESH PANELS

The picture (left) shows the mesh welded onto the frame and is described as being on the 'near' side when viewed.

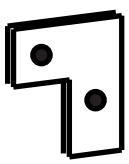


*On handed/angled and corner panels please clearly state if mesh is to be on the near side or far side of the solid rod frame. (Please refer to further information shown)

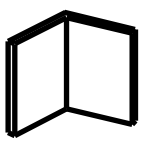
Please note- It is common practice for the rod frame to be on the side closest to pedestrians.

Other types of edging frame are also available for different applications. A few options are shown below. Please call to discuss.

Flat bar frame



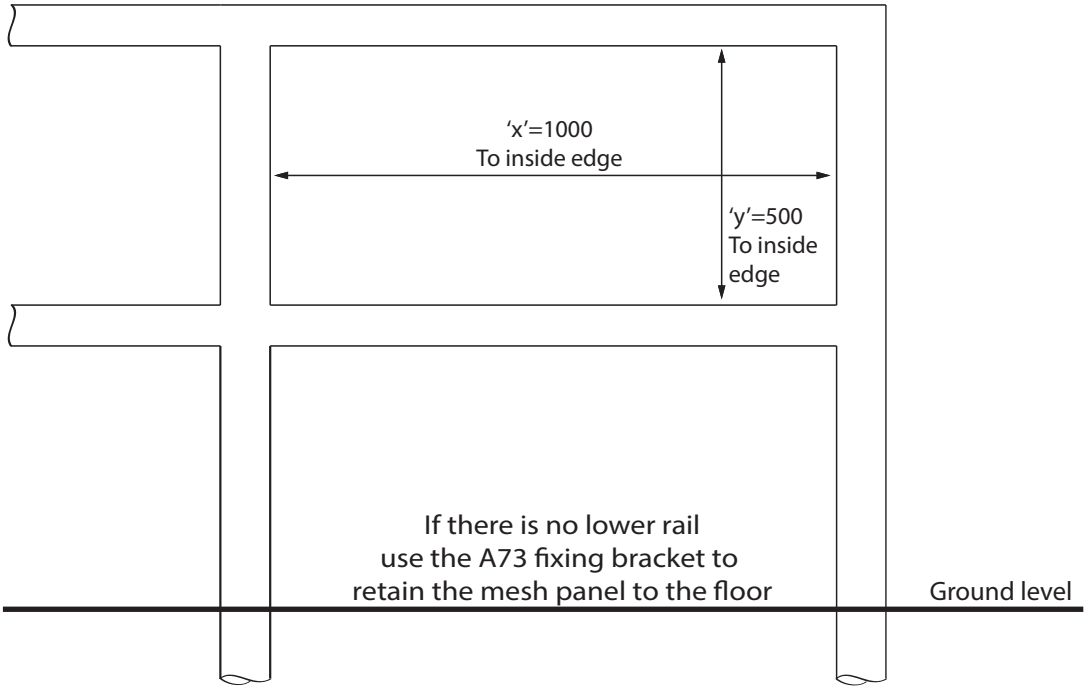
Angle frame



Box section frame

Example 1

Example using size 8 (48.3mm dia tube) inside edge dimensions



'x'= 1000mm (As an example)
Less 42mm twice = 916mm - Manufactured size

'y'= 500mm (As an example)
Less 42mm twice = 416mm - Manufactured size

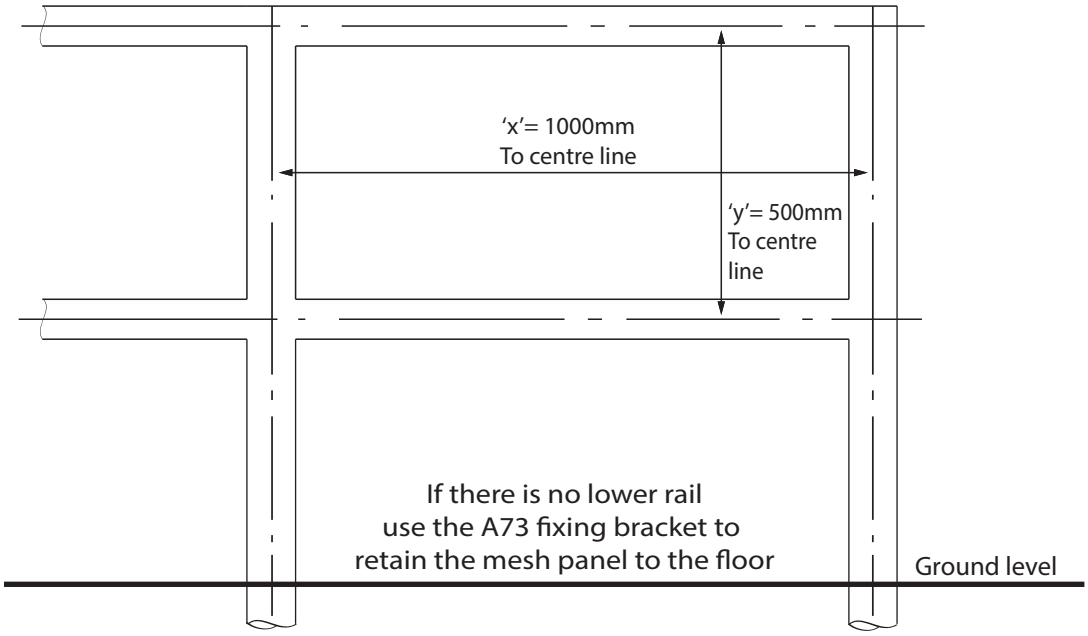
DEDUCT THE FOLLOWING FIGURES FROM EACH SIDE OF THE APERTURE
TO OBTAIN THE MANUFACTURED SIZE OF YOUR MESH PANEL/S

TUBULAR FRAME INSIDE EDGE MEASUREMENTS (EXAMPLE 1 AS ABOVE)

TUBE SIZE OF FRAMEWORK - SIZE 5 (26.9MM DIA)	DEDUCT 37MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 6 (33.7MM DIA)	DEDUCT 40MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 7 (42.4MM DIA)	DEDUCT 42MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 8 (48.3MM DIA)	DEDUCT 42MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 9 (60.3MM DIA)	DEDUCT 40MM FROM EACH SIDE OF APERTURE

Example 2

Example using size 8 (48.3mm dia tube) centreline dimensions



'x'= 1000mm (As an example)
Less 66mm twice = 868mm - Manufactured size

'y'= 500mm (As an example)
Less 66mm twice = 368mm - Manufactured size

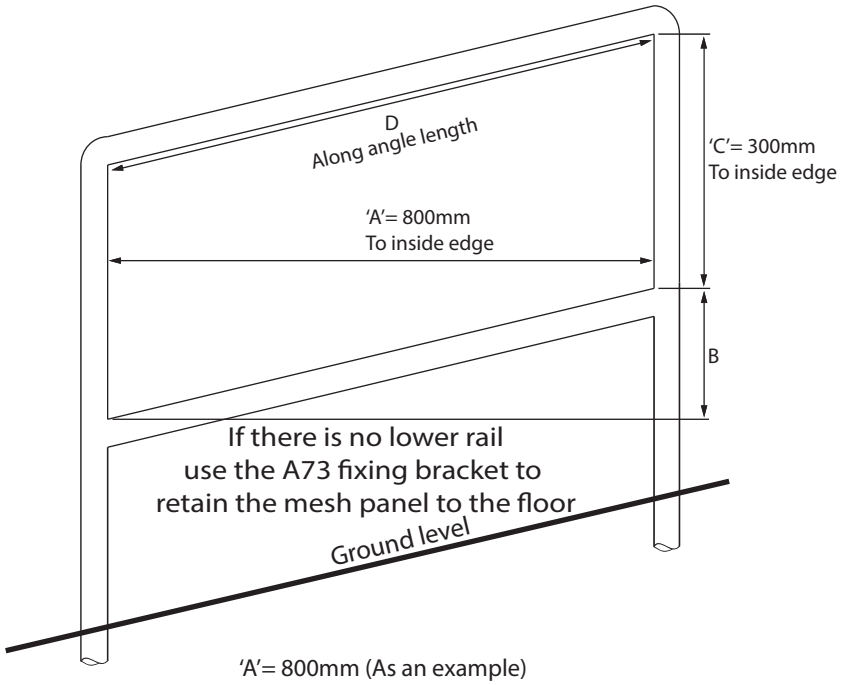
DEDUCT THE FOLLOWING FIGURES FROM EACH SIDE OF THE APERTURE
TO OBTAIN THE MANUFACTURED SIZE OF MESH PANEL/S

TUBULAR FRAME CENTRE LINE MEASUREMENTS (EXAMPLE 2 AS ABOVE)

TUBE SIZE OF FRAMEWORK - SIZE 5 (26.9MM DIA)	DEDUCT 51MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 6 (33.7MM DIA)	DEDUCT 57MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 7 (42.4MM DIA)	DEDUCT 63MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 8 (48.3MM DIA)	DEDUCT 66MM FROM EACH SIDE OF APERTURE
TUBE SIZE OF FRAMEWORK - SIZE 9 (60.3MM DIA)	DEDUCT 70MM FROM EACH SIDE OF APERTURE

Example 3

Example using size 6 (33.7mm dia tube) inside edge dimensions



'A'= 800mm (As an example)
Less 40mm twice = 720mm - Manufactured size
'C'= 300mm (As an example)
Less 40mm twice = 220mm - Manufactured size

Note, use dimension A for the horizontal measurement
Note, use dimension C for the vertical measurement

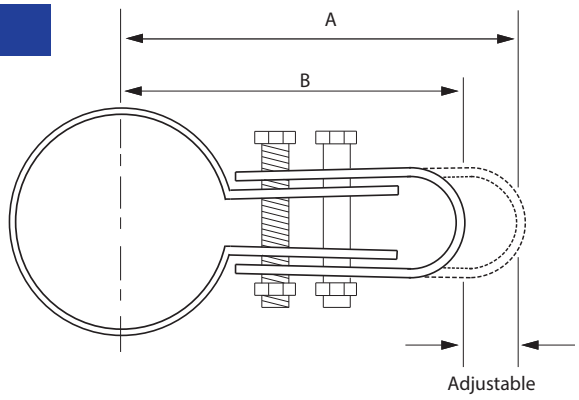
A70

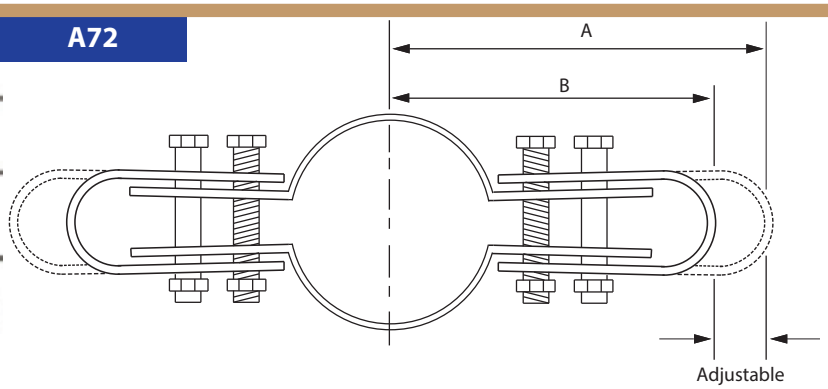


All measurements in mm

Tube Size	A	B
26.9mm	68	58
33.7mm	71	61
42.4mm	75	65
48.3mm	78	68
60.3mm	76	66

Used to connect the mesh panels to the tubular frame.
Spaced at no more than 350mm they provide a strong robust installation.

A72



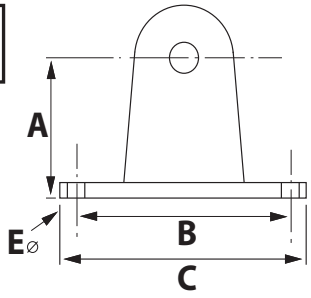
All measurements in mm

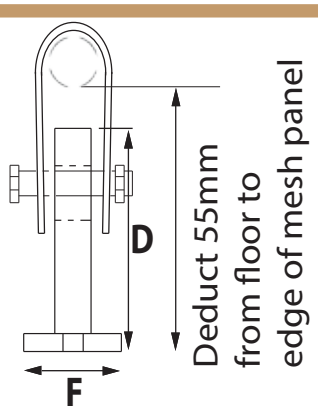
Tube Size	A	B
26.9mm	58	48
33.7mm	71	61
42.4mm	75	65
48.3mm	78	68
60.3mm	76	66

Used to connect the mesh panels either side of the tubular frame.
Spaced at no more than 350mm they provide a strong robust installation.

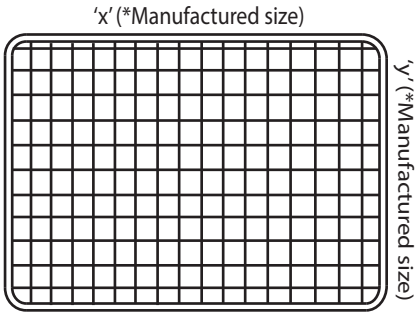
A73

A	B	C	D	E	F
40	84	116	54	12	48

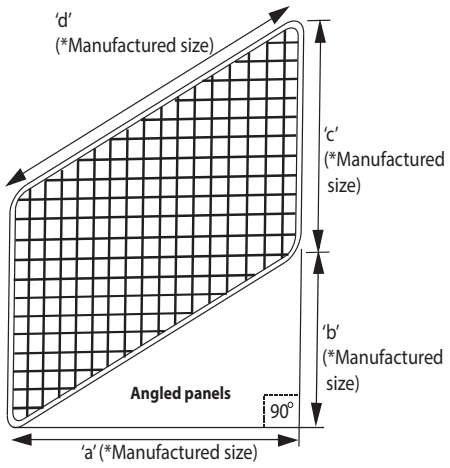




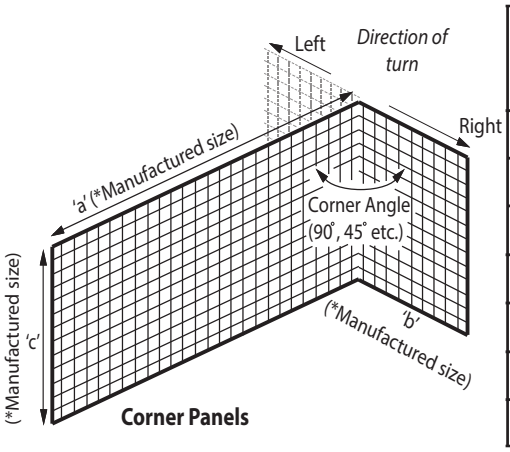
This floor fixing bracket allows the mesh panel to be installed without the need of a lower horizontal rail. Supplied complete with the mesh attachment clip and connection bolt.(Fixing down bolts are not included).
Spaced at no more than 350mm they provide a strong robust installation.



Quantity	'x' (mm)	'y' (mm)



Quantity	'a' (mm)	'b' (mm)	'c' (mm)	'd' (mm)	**Mesh near side or far side (Please tick)	
					Near side	Far side



Quantity	'a' (mm)	'b' (mm)	'c' (mm)	Corner angle	Direction of turn (Please tick)		**Mesh near side or far side (Please tick)	
					Left	Right	Near side	Far side

* See previous pages on how to obtain mesh panel manufactured size.
& for 'near side' and 'far side' explanation.

Please print/copy extra sheets if required.

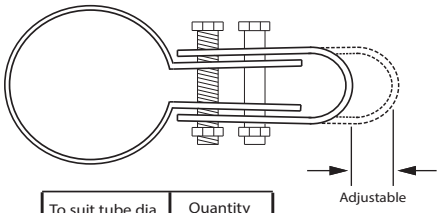
Mesh panel clip type 1
(Product code A70)

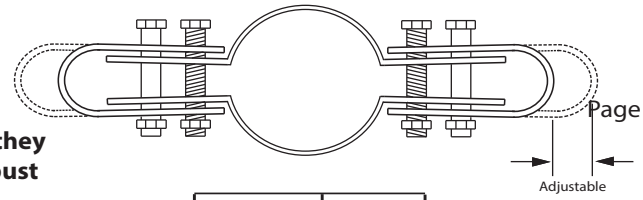
Spaced at no more than 350mm apart, they provide a strong robust installation.



To suit tube dia.	Quantity
26.9mm (Size 5)	
33.7mm (Size 6)	
42.4mm (Size 7)	
48.3mm (Size 8)	
60.3mm (Size 9)	

Mesh panel clip type 2
(Product code A72)

Spaced at no more than 350mm apart, they provide a strong robust installation.



To suit tube dia.	Quantity
26.9mm (Size 5)	
33.7mm (Size 6)	
42.4mm (Size 7)	
48.3mm (Size 8)	
60.3mm (Size 9)	

All measurements in mm
